

US-Based Contract Manufacturing You Can Trust

Let our team become your team

For decades, Drucker Diagnostics has been a trusted **US-based manufacturing partner** for leading healthcare brands. Our expert team supports every stage of the process—from design and prototyping to production and assembly—all from our facilities in the United States.

Our in-house capabilities include injection molding, project design, prototyping, precision molding, and assembly—backed by industry-leading customer support. Whether you need custom parts or full product development, we deliver reliable, cost-effective solutions that reduce operational risk and strengthen your supply chain, all while keeping production close to home.

Why choose Drucker Diagnostics?

Vertically integrated:

Drucker Diagnostics is a vertically integrated manufacturer with in-house design, injection molding, CNC machining, printing, metal bending and forming, instrument assembly, and more.

Quality you can trust:

Our robust quality control systems are built for the high standards of medical device manufacturing.

Stateside manufacturing:

For more than 80 years, the entire Drucker product line has been designed, built, and supported in the USA.

Dedicated experts:

Our trusted team includes engineers, manufacturing specialists, and designers, all working together to optimize every phase of the process and deliver reliable, high-quality results.

Precision Injection Molding

As a US-based manufacturer, we provide fast lead times to ensure you meet even the tightest deadlines. We pride ourselves on providing custom solutions tailored to your unique design and molding requirements, delivering flexibility and precision at every step.

Specifications

Press	Maximum Shot Size
500 Ton Press	61.3 oz
350 Ton Press	42.4 oz
100 Ton Press	4.8 oz
50 Ton Press	2.8 oz
30 Ton Press	0.9 oz

Materials

- Nylon
- ABS and PC-ABS
- Santoprene
- Polyethylene
- Polyethylene Styrene
- Delrin
- Polycarbonate
- Xeony
- Ultem
- Peek
