OVERVIEW

The model 642VFD-PLUS is the global version of the popular clinical centrifuge 642E. Using patented technology, this centrifuge reduces blood separation processing times by 50% or more while minimizing the use of valuable counter space. The performance of the 642VFD-PLUS maximizes sample integrity by keeping your patient samples cool during centrifugation, by providing high quality gel separation layers, and by minimizing the presence of cells or fibrin strands in the serum or plasma.

APPLICATIONS

The model 642VFD-PLUS, with two customizable preset speeds, is simple yet flexible enough for any application and its high performance provides the 1,500 - 2,000 xg necessary for platelet poor plasma coagulation samples and the 500 xg required for sensitive urine samples. The built-in universal power supply and UL/CE safety approvals allow for global use.

FEATURES

- **Electronic Timer**: Preset to 10 minutes, selectable from 1 to 30 minutes
- **Capacity**: Six (6) tubes up to 17 mm x 100 mm (10 mL)
- **Brushless AC Motor**: Smooth operation with no routine maintenance
- **Quiet Operation with Low Vibration**: Double-encased motor assures quiet performance and low out-of-balance vibration
- **Cool Operation**: Unique air-flow design cools the rotor chamber and motor with ambient air; protecting your samples and maximizing sample integrity
- **Footprint**: Compact design uses less than 1 sq. ft. of counter space

SAFETY

- **Automatic Lid Lock**: Centrifuge will not run with the lid open and the lid cannot be opened while samples are spinning
- **Positive Lid Latching**: Firm mechanical latching of the lid prevents the escape of debris in case of tube breakage
- **Clear Shatter Proof Lid**: Allows for safe sample observation, optical calibrations, and access for photo tachometer
- **Global Regulatory Approvals**: Certified to US, Canadian, and European Safety standards
- **Reinforced Guard Bowl**: Provides maximum safety and durability
**Warranty**
